- **Repo:** <https://github.com/mrunalhirve12/Portfolio>
- **Reference:**
https://www.w3schools.com/w3css/tryw3css_templates_cv.htm
<https://fontawesome.com/>
- **Challenges:**
 1. **Working with a template:** I initially thought of doing the Portfolio by referring a template. The template that I referred was using custom w3 css. Initially grasping and working with it was bit confusing
 2. **Icons:** Some of the icons that I wanted to use on my pages from fontawesome were not getting reflected and only few were visible on custom template that I was using. Find the right ones was time consuming
 3. **Zoom out my pages:** I am still working on and finding ways how can I zoom out my page, so it does not fill the entire screen
